PROFESSIONAL SUMMARY

Performance-driven Full Stack Engineer specializing in Next.js, Node.js, and TypeScript. Leverages a strong foundation in Data Structures and Algorithms (DSA) to architect scalable systems, optimize database queries, and reduce API latency. Proven ability to deliver production-ready fintech and SaaS solutions with bank-grade security and seamless user experiences.

TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, Tailwind CSS, Redux

Core Engineering: System Design, API Architecture, Advanced DSA, Atomic Transactions, Caching Strategy

Backend & DB: Node.js, Express.js, PostgreSQL, MongoDB, Prisma ORM, Redis, REST API, WebSocket

Tools & Ops: Docker, Git/GitHub Actions, Vercel, Stripe, JWT, OpenAI API

EXPERIENCE

Full Stack Developer (Contract)

Nov 2025 – Feb 2026

Fly Bismillah · Remote

- Architected a flight booking system using Next.js and Node.js, reducing failure rates by 40% via robust Duffel API integration and secure admin tools.
- Implemented Redis caching layers and optimized search algorithms, cutting average API response times by ~60% under high concurrent loads.

SELECTED PROJECTS

FinVault – AI-Powered Banking Platform · Next.js, TypeScript, MongoDB, Gemini AI

- Engineered a full-stack fintech banking platform with AI-driven transaction management, enabling users to send money, track spending, and manage finances through a conversational interface powered by Gemini AI.

Voter Portal – AI-Powered Voter Search Portal · Next.js, MongoDB

- Built a voter search system using Next.js and MongoDB for fast lookup across large multi-ward datasets. Optimized search and filtering logic to improve data retrieval speed and efficiency.

FlexIn – Smart E-commerce Platform

- Built an e-commerce platform using Next.js with fast cart access ($O(1)$). Integrated a model-based product recommendation system to suggest relevant products based on user behavior. Focused on performance, scalable architecture, and smooth shopping experience.

EDUCATION

Self-Taught Full Stack Engineer with Strong DSA Foundation

Jan 2022 – Present

Mastered core concepts of Data Structures and Algorithms through self-study and real-world project implementations, focusing on system optimization and performance.

Higher Secondary Certificate (Commerce)

2022 – 2024

Studied accounting, business studies, and finance fundamentals with emphasis on analytical thinking and decision-making skills.
